Problem The FOS SGI Indy, Luey, is not currently be used by the FOS software and is sitting idle in the Mini-EOC. Due to the shortage of available equipment, we want to maximize utilization of all of our equipment. Therefore, we would like to move luey to a desktop to be used like an Xterm. This would then make beepbeep available to be assigned to one of the FOS temporary staff.			
Proposed Solution Move luey from 1105 to 2136J and assign it IP address 155.157.100.61. Move beepbeep from 2136J to 1105 and assign it IP address 155.157.100.115. FOS will move the machines and coordinate the DNS changes with Carlton.
